

Topigs Norsvin also benefits from the traceability of sales: each sales representative was assigned his own salesman code, allowing all entries to be displayed in an overview table. Due to the significantly improved data maintenance and filter functions in the app, simple evaluations can also be carried out very quickly. Certain settings can also be used to assign e-mail distributors to the companies, which support Topigs Norsvin in sending information such as invitations to events.

About Anveo

Anveo offers powerful add-ons for Microsoft Dynamics NAV: The 100% offline-capable [Anveo Mobile App](#) is the perfect solution for sales representatives or service technicians, and can also be customized to every other deployment scenario. [Anveo EDI Connect](#) offers a unique and comprehensive software to exchange data with or within Microsoft Dynamics NAV. With [Anveo Web Portal](#) you will get a simple, web based access to NAV for restricted user groups. It can be deployed as customer or employee portal. All Anveo Add-ons are fully NAV integrated and enable a self-sustaining handling and configuration. Anveo software supports Microsoft Dynamics NAV 2009 R2 to the current version.
