

Success Story Topigs Norsvin

Anveo Sales App for Mobile Data Access

All data available at any time: Work facilitation for field staff thanks to the Anveo Mobile App

TOPIGS-SNW GmbH is one of the largest suppliers of breeding pig genetics worldwide and is known for its unique breeding program. Research, innovation and the development of genetic progress are the cornerstones of the company.

The core business of TOPIGS-SNW GmbH is to supply farmers with high-quality gilts and boar sperm. The company is constantly growing because more and more piglet producers are convinced of the products as well as the expertise and service.

TOPIGS-SNW GmbH

Business field: Supplier of breeding pig genetics

Employees: 50

Sites: Headquarters in Vught (Netherlands), Senden (Germany)

Go-Live with Anveo: Offline Sales App in use since early 2015

Website: topignorsvin.com

Situation before introduction of Anveo

- ⊗ Data maintenance incomplete and complicated
- ⊗ Customer and operating information only on the stationary computer in the office
- ⊗ Loss of information due to lack of mobile availability

Profits through Anveo

- ✓ Permanent access to all operating information
- ✓ Simplified data maintenance
- ✓ Quality of data has been improved
- ✓ Traceability of sales
- ✓ More fluid workflows for field representatives

Initial Situation

TOPIGS-SNW works service-oriented with qualified field staff directly on site at the farms. Before switching to Anveo, a program was used in which customer and company information as well as visit reports could only be recorded and read via the stationary computer in the office.

"The evening before a company visit, the required customer information had to be printed out so that it could be available the following day," says Martin Gerdes, sales representative at Topigs Norsvin. He further describes that the data maintenance was very incomplete, as it was too complicated for many employees to keep the data up to date in the postprocessing.

Requirements and Implementation

Topigs Norsvin was looking for a mobile solution that would provide its field staff with all relevant data (including visit reports, company information and current delivery information) anytime, anywhere - **regardless of the Internet connection**. The sales staff should be able to quickly and easily acquire the latest information and enter new data while on the move.

The Anveo Mobile App was individually adapted to the customer's requirements and to the workflows in the agricultural sector - no problem at all due to the flexibility of the solution. In order to be able to use the Anveo App, all sales representatives were equipped with tablets.

Result and Conclusion

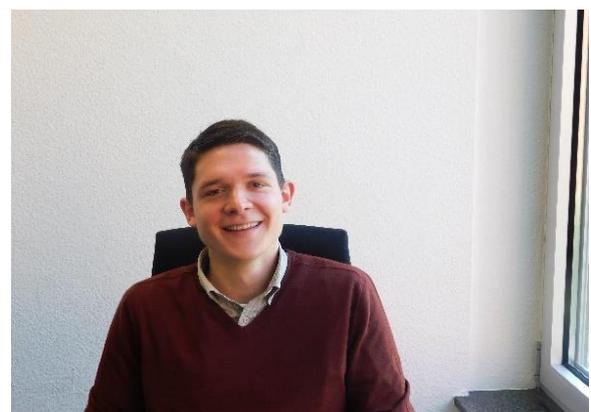

Lukas Keil sums up the main advantages of the app: *"By using the Anveo app, we now have all the operating information directly at hand, even those that were previously less important or for which we spared the effort of data maintenance. Previously, this data was only recorded in visit reports - today, everything is available at a glance. As far as time permits, our sales representatives write the visit report on the tablet directly after the conversation with the farmer. For the farmer himself, they use the App to inform yourself about current deliveries or complaints. Another advantage of the Anveo App is that it works offline. Only for data transmission or synchronization with Microsoft Dynamics NAV is a connection to the Internet necessary."*

"Finally, I have all the necessary operating information always and everywhere at hand and can enter all new information directly into Anveo after my visit to the farmer, so that my colleagues know what's going on!"

Martin Gerdes

Sales Representative, Sales NRW
TOPIGS-SNW GmbH

„Anveo offers us the possibility to bring the most important information of our companies to the field service. And to use them where they are needed.“

Communication & Reproduction
TOPIGS-SNW GmbH

Topigs Norsvin also benefits from the traceability of sales: each sales representative was assigned his own salesman code, allowing all entries to be displayed in an overview table. Due to the significantly improved data maintenance and filter functions in the app, simple evaluations can also be carried out very quickly. Certain settings can also be used to assign e-mail distributors to the companies, which support Topigs Norsvin in sending information such as invitations to events.

About Anveo

Anveo offers powerful add-ons for Microsoft Dynamics NAV: The 100% offline-capable [Anveo Mobile App](#) is the perfect solution for sales representatives or service technicians, and can also be customized to every other deployment scenario. [Anveo EDI Connect](#) offers a unique and comprehensive software to exchange data with or within Microsoft Dynamics NAV. All Anveo Add-ons are fully NAV integrated and enable a self-sustaining handling and configuration. Anveo software supports Microsoft Dynamics NAV 2009 R2 to the current version.
